

570ACO-X19-10G

Automatic Change Over with Audio/Video Monitoring

The 570ACO-X19-10G is an auto clean switch designed for auto failover of SMPTE ST 2110 signals due to video faults, audio faults or data faults with selectable priority for each input signal. The 570ACO-X19-10G contains three independent cores with 4x SMPTE ST 2110 inputs (A, B, C, D), each capable of producing 2x SMPTE ST 2110 and HD/SDI outputs (Program and Preview).

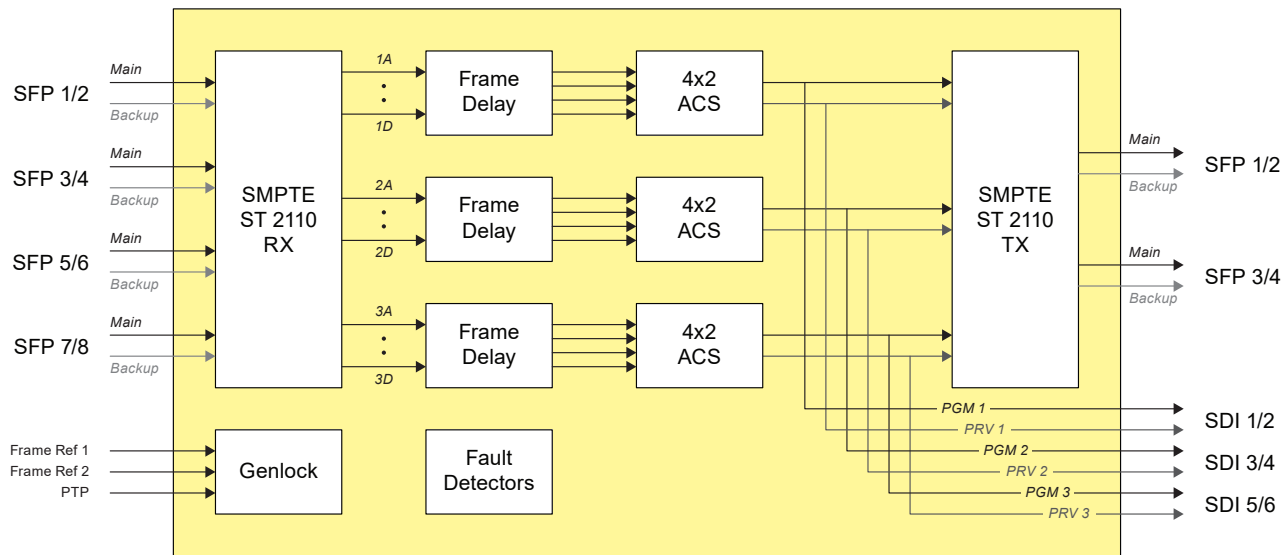

Monitoring capabilities include the ability to detect HD/SDI errors. Parameters include frozen video detection, black video detection, picture and audio level monitoring as well as ancillary data monitoring. Many of these parameters have user-adjustable thresholds and time periods to suit any application.

►Features & Benefits

- SMPTE ST 2022-7 on all ST 2110 main/backup inputs
- Configurable frame delay up to 14 frames per video path (audio and ANC follow video)
- Support slipless mode to auto-sync videos from different inputs
- Program and Preview outputs can be manually overridden by the customer to select any input
- Clean video switch, no TRS violations on video output
- Quiet audio switch, no pops
- Full in-band control support for MAGNUM routing
- VGPI support from MAGNUM
- Priority setting for input failover
- Can force disable an input to exclude it
- Reversible and non-reversible failover
- A fault reported can be included or excluded in the failover decision-making
- Can function 4x1, 3x2, 3x1 and 2x1 ACS by disabling unused inputs/outputs
- Failover faults:
 - Frozen video
 - Video missing
 - Audio missing
 - Audio silence
 - Closed caption missing
 - SCTE104 missing

►Specifications

Serial Digital Video:		Number of Outputs: 6	Electrical:
Standards:	SMPTE ST 424M (3Gb/s), SMPTE ST 292M (1.5Gb/s)	Connector: DIN	Voltage: +12V DC
		Signal Level: 800mV nominal	Power: 90W
		DC Offset: 0V ±0.5V	EMI/RFI: Complies with FCC regulations for class A devices, complies with EU EMC directive
		Return Loss: >12 dB up to 1.5GHz	
IP Input:		IP Output:	
Ethernet Interface:	8x 10GbE SFP+ (APP A), 6x 10GbE SFP+ (APP B)	Ethernet Interface:	4x 10GE SFP+ (APP A and B)
Decapsulation:	SMPTE ST 2110	Encapsulation:	SMPTE ST 2110
Serial Video Output:		Switching Reference:	
Standards:		Reference Input:	2x BNC on 570FR; Analog 525/625; PTP (IEEE 1588-2008) via 10GbE interface
APP A:	STMPE ST 424M (3Gb/s), STMPE ST 292M (1.5Gb/s)		
APP B:	STMPE ST 292M (1.5Gb/s)		
		Physical:	
		Number of Slots:	2
		Enclosures:	
		S570FR:	3RU chassis
		570FR:	1RU chassis

►Ordering Information

570ACO-X19-10G Automatic change over with audio/video monitoring, 10GbE I/O and SDI outputs (SFP+ sold separately)
