

The 7800DA8-RS422 distribution amplifiers provide reliable distribution of serial RS-232, 422 and 485 unidirectional data. The 7800DA8-RS-422 provides 8 copies of the original serial input. This product also provides intelligent monitoring of the input signal and can alarm if no activity is detected on the input. Thresholds for alarm notification are user configurable via SNMP.

The 7800DA8-RS422 occupies one module slot within the 7700FR and 7800FR 3RU family of frames, which will hold up to 15 modules.

VistaLINK® capable for remote monitoring, control and configuration capabilities via SNMP; using VistaLINK® PRO, CP-2116E or CP-2232E Control Panels. VistaLINK® is available when modules are used with the 3RU 7800FR frame and a 7700FC VistaLINK® Frame Controller module in slot 1 of the frame

The 7800DA8-RS422 modules are VistaLINK® PRO capable, offering remote monitoring, control and configuration via Simple Network Management Protocol (SNMP).
