A LETTER TO FELLOW SHAREHOLDERS

Over the past several years, Evertz has emerged as one of the largest pure players in the broadcast media technology sector as it coalesces with IP-video and adjusts to the ongoing divestment and sale activities of multiple participants.

In Fiscal 2012, the global economic environment remained tense, impacted by the European sovereign debt contagion and the unfolding of political turmoil in the Middle East and North Africa. During this period, Evertz succeeded in generating record international sales. We continued to deliver industry leading profitability while expanding our market through growth of our product portfolio and increased channel presence and market reach. Highlights from the year include:

- Sales over $293 million;
- International sales increase of 5% to a record $144 million;
- Earnings before taxes of $82 million;
- Annual investment in research and development increased 24%;
- Our dedicated staff grew to 1,097;
- Year-end net cash and instruments held for trading of $186 million; and
- Repurchase of over 2 million common shares and a 17% increase in quarterly cash dividends to 14¢ per share.

DRIVEN BY DEMAND FOR MORE HD CONTENT AND TV ANYWHERE, ANYTIME

Today our customers’ evolving needs are driven by an unsatiated global demand for more high-definition television channels and by an increasing consumer appetite for high quality video delivered anywhere, anytime across a broad array of devices “TV Everywhere”. Evertz technologically superior solutions provide compelling advantages which enable our broadcast, cable, telco, IPTV, satellite and content creator customers to address this increasingly complex video landscape and to implement the multi-screen TV Everywhere services of the future.

LEADING BY INNOVATION

Evertz positive outlook is reinforced by our long standing commitment and investment in the internal development of new leading edge technologies and in the recruitment of talented individuals. In fact, during the past year alone, Evertz has increased our annual investment in R&D by 24% to over $44 million. The annual investments fueled our high paced development activities within our core product portfolio and also funded additional intensive longer term R&D initiatives, such as Evertz Advanced Optical Multi-Service Transport Platform, our IT-based architecture and Evertz Compression & Media Transport solutions. These initiatives are establishing new benchmarks for performance and operational efficiency for our customers and have significantly expanded Evertz addressable market.

In April 2012, we again expanded our solution breadth and market with the introduction of another such R&D initiative, Evertz award winning Dreamcatcher, the next generation of live slow motion replay for sports broadcast and studio production.
**AWARDS & ACHIEVEMENTS**

Recognition for Evertz leadership commitment to innovation was exemplified this past year through several awards including:

**TV Technology Europe - 2011 STAR (Superior Technology Award Recipient) Award to MAGNUM VUE.** MAGNUM VUE is a user customizable graphical interface that unifies the control of various elements from a single point of control. MAGNUM VUE’s user friendly, touch screen enabled interface provides flexible and reliable control across all broadcast operations allowing users to integrate the control of routing systems, multi-viewers, master control and branding engines, infrastructure equipment, and more to reduce complexity for the operator and increase productivity.

**TV Technology - 2012 STAR Award to Dreamcatcher.** The STAR Awards are designed to celebrate and showcase the preeminent technological innovations available to the media industry today. *Dreamcatcher* is the next generation of live slow motion replay. *Dreamcatcher*’s superior editing technology along with its highly scalable and flexible system architecture enables the most reliable and precise slo-mo replays in the industry. It’s flexible design and intuitive graphical user interface offers amazing new visualization tools for managing all media.

**Broadcast Engineering - 2012 Pick Hit Award to Evertz 7812 Conversion Platform.** The Pick Hit award recognizes innovative products and technology that will technically and financially improve a facility’s operation. The 7812 Platform executes broadcast quality up/down/cross conversions between common standard definition and high definition video signals.

Evertz was named one of Canada’s 50 Best Managed Companies, which recognizes excellence in Canadian-owned and Canadian-managed companies. Canada’s 50 Best Managed Companies identifies Canadian corporate success through companies focused on their core vision, creating stakeholder value and excelling in the global economy.

**FOUNDATION FOR GROWTH**

In this changing environment, we stand with great opportunity as a company built upon a long term vision of generating value through continuous investment in our comprehensive technology portfolio, maintaining strict operating discipline and expanding the reach of our international sales channels.

We generate significant cash from operations and have built a solid balance sheet, with total assets of $432 million at the end of fiscal 2012, including approximately $186 million in cash and equivalents. We view these strengths as a competitive advantage, providing financial flexibility and allowing us to provide significant value to our shareholders via our share repurchase program and the continued payment of quarterly dividends, while adhering to our strategy of investment into new technologies.
EXPANDING MARKET & MOMENTUM

Our 2013 plan is to accelerate the market penetration of the new technologies we have invested heavily in for the past several years. Evertz will leverage the newly developed technologies of:

- IT-based solutions in station group central-cast;
- ATP Multi-Service Transport in next generation converged networks;
- Evertz Compression & Media solutions; and
- Dreamcatcher in sports slow motion replay.

These technologies provide superior leading edge solutions to enable our broadcast, cable, telco, satellite and content creator customers to address and implement the multi-screen TV Everywhere services of the future.

We are pleased with the significant developments in new products and we are excited about entering fiscal 2013 with significant momentum, evidenced by the highest combined purchase order backlog and monthly shipment total in the Company’s history. As one of the largest pure players in our technology sector, we believe Evertz is poised for continued long term success.

We would like to take this opportunity to thank our employees, channel partners, customers and shareholders for their ongoing support and we look forward to an exciting, successful future.

Romolo Magarelli  
Director, President and Chief Executive Officer

Douglas A. DeBruin  
Director, Chairman of the Board of Directors
MANAGEMENT’S DISCUSSION AND ANALYSIS

For the Year ended April 30, 2012

THE FOLLOWING MANAGEMENT’S DISCUSSION AND ANALYSIS IS A REVIEW OF RESULTS OF THE OPERATIONS AND THE LIQUIDITY AND CAPITAL RESOURCES OF THE COMPANY. IT SHOULD BE READ IN CONJUNCTION WITH THE SELECTED CONSOLIDATED FINANCIAL INFORMATION AND OTHER DATA AND THE COMPANY’S CONSOLIDATED FINANCIAL STATEMENTS AND THE ACCOMPANYING NOTES CONTAINED ON SEDAR. THE CONSOLIDATED FINANCIAL STATEMENTS OF THE COMPANY ARE PREPARED IN ACCORDANCE WITH INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRS”) AND ARE PRESENTED IN CANADIAN DOLLARS. THE FISCAL YEAR OF THE COMPANY ENDS ON APRIL 30 OF EACH YEAR. CERTAIN INFORMATION CONTAINED HEREIN IS FORWARD-LOOKING AND BASED UPON ASSUMPTIONS AND ANTICIPATED RESULTS THAT ARE SUBJECT TO RISKS, UNCERTAINTIES AND OTHER FACTORS. SHOULD ONE OR MORE OF THESE UNCERTAINTIES MATERIALIZE OR SHOULD THE UNDERLYING ASSUMPTIONS PROVE INCORRECT, ACTUAL RESULTS MAY VARY SIGNIFICANTLY FROM THOSE EXPECTED.

FORWARD-LOOKING STATEMENTS

The report contains forward-looking statements reflecting Evertz’s objectives, estimates and expectations. Such forward-looking statements use words such as “may”, “will”, “expect”, “believe”, “anticipate”, “plan”, “intend”, “project”, “continue” and other similar terminology of a forward-looking nature or negatives of those terms.

Although management of the Company believes that the expectations reflected in such forward-looking statements are reasonable, all forward-looking statements address matters that involve known and unknown risks, uncertainties and other factors. Accordingly, there are or will be a number of significant factors which could cause the Company’s actual results, performance or achievements, or industry results to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements.

The report is based on information available to management on May 18, 2012.

OVERVIEW

Evertz is a leading equipment provider to the television broadcast industry. Founded in 1966, Evertz designs, manufactures and distributes video and audio infrastructure equipment for the production, post-production, and transmission of television content. The Company’s solutions are purchased by content creators, broadcasters, specialty channels and television service providers to enable and enhance the transition to a complex multi-channel digital and HDTV broadcast environment. The Company’s equipment allows customers to generate additional revenue while reducing costs through the more efficient distribution and management of content as well as the automation of previously manual processes.

The Company’s growth strategy is based on capitalizing on its strong customer position and innovative integrated product line. The Company’s financial objectives are to achieve profitable growth with our existing customers and with new customers who were converting to HDTV, building out IPTV infrastructures, or in need of advanced video solutions.

Our plan is to bring to market the new technologies that we have invested heavily in for the past several years. These technologically superior solutions help to enable our broadcast, cable, telco, satellite and content creator customers to address and implement their video infrastructure requirements.

Our broadcast customers continue to operate in a challenging economic environment which impacts their ability to incur capital expenditures and often results in projects being scaled back or postponed to later periods.

While it does appear that industry conditions are showing some improvement. In certain geographical areas it is unclear what the time frame will be for our customers to convert this to equipment purchases.

INTERNATIONAL FINANCIAL REPORTING STANDARDS

The Canadian Accounting Standards Board requires Canadian publicly accountable enterprises to adopt IFRS in 2011 to replace Canadian Generally Accepted Accounting Principles (“GAAP”). Accordingly, the financial statements have been prepared in accordance with IFRS, with a transition date of May 1, 2010 to allow for comparative financial information. Financial information disclosed in this MD&A for periods ending prior to May 1, 2010 has not been restated.
The Company's IFRS conversion plan was comprehensive and addressed matters including staff training, changes in accounting policies, restatement of comparative periods, internal controls and procedures, disclosure controls, and business activities in general. The changeover to IFRS did not result in a material impact to the Company's business functions and activities including internal controls and procedures.

Although IFRS employs a conceptual framework that is similar to Canadian GAAP, there are differences in recognition, measurement and disclosure. The “First Time Adoption of IFRS” section of this MD&A provides a summary of the transitional exemptions and elections taken by the Company, as well as relevant differences in accounting policies between Canadian GAAP and IFRS.

The note also provides reconciliations of assets, liabilities, shareholders’ equity and net earnings for specified periods previously prepared under Canadian GAAP to that under IFRS. The information provided in this MD&A and in the financial statements with respect to the transition to IFRS reflects current views, assumptions and expectations.

**SIGNIFICANT ACCOUNTING POLICIES**

Outlined below are those policies considered particularly significant:

**Basis of Measurement**
These financial statements have been prepared on the historical cost basis except for certain financial assets and liabilities which are stated at fair value. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

**Functional and Presentation Currency**
These financial statements are presented in Canadian dollars, which is the Company’s functional currency. All financial information presented in Canadian dollars has been rounded to the nearest thousand.

**Basis of Consolidation**
These financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of are included in the consolidated statements of earnings and comprehensive income from the effective date of acquisition and up to the effective date of disposal, as appropriate. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

All intra-Company transactions, balances, income and expenses are eliminated in full on consolidation.

**Business Combinations**
Business combinations are accounted for using the acquisition method. The cost of the acquisition is measured at the aggregate of the fair values, at the date of acquisition, of assets transferred, liabilities incurred or assumed, and equity instruments issued by the Company. The acquiree’s identifiable assets and liabilities assumed are recognized at their fair value at the acquisition date. Acquisition-related costs are recognized in earnings as incurred. Any contingent consideration is measured at fair value on date of the acquisition and is included as part of the consideration transferred. The fair value of the contingent consideration liability is re-measured at each reporting date with corresponding gain/loss recognized in earnings. The excess of the consideration over the fair value of the net identifiable assets and liabilities acquired is recorded as goodwill.

On an acquisition by acquisition basis, any non-controlling interest is measured either at the fair value of the non-controlling interest or at the fair value of the proportionate share of the net identifiable assets acquired. Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.
Revenue Recognition
Revenue is measured at the fair value of consideration received or receivable, net of discounts and after eliminating intercompany sales.

Where revenue arrangements have separately identifiable components, the consideration received or receivable is allocated to each identifiable component and the applicable revenue recognition criteria are applied to each of the components.

Revenue is derived from the sale of hardware and software solutions including related services, training and commissioning. Revenue from sales of hardware and software are recognized upon shipment, provided that the significant risks and rewards of ownership have been transferred to the customer, the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, revenue can be reliably measured and its probable that the economic benefits will flow to the Company. Service revenue is recognized as services are performed.

Certain of the Company’s contracts are long-term in nature. When the outcome of the contract can be assessed reliably, the Company recognizes revenue on long-term contracts using the percentage of completion method, based on costs incurred relative to the estimated total contract costs. When the outcome of the contract cannot be assessed reliably contract costs incurred are immediately expensed and revenue is recognized only to the extent that costs are considered likely to be recovered.

Interest revenue
Interest revenue is recognized when it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably. Interest revenue is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset’s net carrying amount on initial recognition.

Cash and cash equivalents
Cash and cash equivalents include cash on hand and in the bank, net of outstanding bank overdrafts.

Inventories
Inventories consist of raw materials, work in progress and finished goods. Inventories are stated at the lower of cost and net realizable value. Cost is determined on a weighted average basis and includes raw materials, the cost of direct labour applied to the product and the overhead expense.

Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Property, plant and equipment
Property, plant and equipment are stated at cost less accumulated depreciation and any recognized impairment loss. Where the costs of certain components of an item of property, plant and equipment are significant in relation to the total cost of the item, they are accounted for and depreciated separately. Depreciation expense is calculated based on depreciable amounts which is the cost of an asset less residual value and is recognized in earnings on a straight-line basis over the estimated useful life of the related asset. Borrowing costs are capitalized to the cost of qualifying assets that take a substantial period of time to be ready for their intended use.
The estimated useful lives are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Basis</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office furniture and equipment</td>
<td>Straight-line</td>
<td>10 years</td>
</tr>
<tr>

<td>10 - 40 years</td>
</tr>
<tr>
<td>Airplanes</td>
<td>Straight-line</td>
<td>10 - 20 years</td>
</tr>
</tbody>
</table>

The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in earnings.

The Company reviews the residual value, estimated useful life and the depreciation method at each reporting period.

**Impairment of non-financial assets**

Goodwill is tested for impairment annually, or whenever events or changes in circumstances indicate that the carrying amount may be more than its recoverable amount. At each reporting period, the Company reviews the carrying amounts of its other non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash inflows that are largely independent from other assets, the Company estimates the recoverable amount of the cash-generating unit (“CGU”) to which the asset belongs. Goodwill is allocated to a group of CGU’s based on the level at which it is monitored for internal reporting purposes.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset or CGU is estimated to be less than its carrying amount, the carrying amount of the asset or CGU is reduced to its recoverable amount. An impairment loss relating to a CGU to which goodwill has been allocated, is allocated to the carrying amount of the goodwill first. An impairment loss is recognized immediately in earnings.

An impairment loss in respect of goodwill is not reversed. Where an impairment loss subsequently reverses for other non-financial assets, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or CGU in prior years. A reversal of an impairment loss is recognized immediately in earnings.

**Intangible Assets**

**Intangible assets**

Intangibles assets represent intellectual property acquired through business acquisitions and are recorded at cost less any impairment loss and are amortized using the straight-line method over a four-year period. The estimated useful life and amortization method are reviewed at the end of each reporting period.

**Research and development**

All research and development expenditures are expensed as incurred unless a development project meets the criteria for capitalization. Development expenditures are capitalized only if development costs can be measured reliably, the product of process is technically and commercially feasible, future economic benefits are probable and the Company
intends to and has sufficient resources to complete development and to use or sell the asset. No internally generated intangible assets have been recognized to date.

Research and development expenditures are reduced by investment tax credits and related government grants. Investment tax credits for scientific research and experimental development are recognized in the period the qualifying expenditures are incurred if there is reasonable assurance that they will be realized.

**Provisions**
Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

**Leasing**
Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Assets held under finance leases are recognised as assets of the Company at their fair value or, if lower, at the present value of the minimum lease payments, each determined at the inception of the lease. The corresponding liability to the lessor is included in the Statement of financial position as a finance lease obligation.

Rentals payable under operating leases are charged to earnings on a straight-line basis over the term of the relevant lease.

**Foreign Currency Translation**
The individual financial statements of each subsidiary entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each group entity are presented in Canadian dollars ("CDN"), which is the functional currency of the parent Company and the presentation currency for the financial statements.

In preparing the financial statements of the individual entities, transactions in currencies other than the entity’s functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences are recognized in earnings in the period in which they arise. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Company’s foreign operations are expressed in Canadian dollars using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the period. Foreign currency gains and losses are recognized in other comprehensive income. The relevant amount in cumulative foreign currency translation adjustment is reclassified into earnings upon disposition or partial disposition of a foreign operation and attributed to non-controlling interests as appropriate.

**Income Taxes**

*Current tax*
The tax currently payable is based on taxable profit for the year. Taxable profit differs from net earnings as reported in the statement of earnings because it excludes items of income or expense that are taxable or deductible in other years.
and it further excludes items that are never taxable or deductible. The Company’s liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the statement of financial position date.

**Deferred tax**

Deferred tax is the tax expected to be payable or recoverable on unused tax losses and credits, as well as differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which unused tax losses, credits and other deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realized. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax is charged or credited to earnings, except when it relates to items charged or credited directly to other comprehensive income or equity, in which case the deferred tax is also dealt with in other comprehensive income or equity.

**Share Based Compensation**

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 16 of the financial statements.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period of the option based on the Company’s estimate of the number of equity instruments that will eventually vest. At each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognized in earnings such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to share based payment reserve.

**Earnings per Share**

The Company presents basic and diluted earnings per share (EPS) data for its common shares. Basic EPS is calculated by dividing the net earnings attributable to shareholders by the weighted average number of common shares outstanding during the period. Diluted EPS is determined by adjusting the net earnings attributable to shareholders and the weighted average number of common shares outstanding for the effects of all potentially dilutive common shares, which is comprised of share options granted to employees with an exercise price below the average market price.

**Borrowing Costs**

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognized in earnings in the period in which they are incurred.

**Investment Tax Credits**

The Company is entitled to investment tax credits, which are earned as a percentage of eligible research and development expenditures incurred in each taxation year. Investment tax credits relate entirely to the Company’s
research and development expenses in the consolidated statement of earnings but are presented separately in the consolidated statement of earnings for information purposes. Investment tax credits are recognized when there is reasonable assurance they will be received.

Financial Instruments
The Company’s financial assets and liabilities which are initially recorded at fair value and subsequently measured based on their assigned classifications as follows:

<table>
<thead>
<tr>
<th>Asset/Liability</th>
<th>Category</th>
<th>Measurement</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

Financial Assets
All financial assets are initially measured at fair value, plus transaction costs, except for those financial assets classified as fair value through profit or loss, which are initially measured at fair value.

Financial assets are classified into the following specific categories: financial assets “at fair value through profit or loss” (FVTPL), “held-to-maturity” investments, “available-for-sale” (AFS) financial assets and “loans and receivables”. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognized in earnings.

Transaction costs in respect of financial instruments are fair value through profit or loss are recognized in earnings immediately. Transaction costs in respect of other financial instruments are included in the initial measurement of the financial instrument.

Impairment of financial assets
Financial assets, other than those at FVTPL, are assessed for indicators of impairment at each reporting period. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected. For certain categories of financial assets, such as trade and other receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment of a financial asset can include a significant or prolonged decline in the fair value of an asset, default or delinquency by a debtor, indication that a debtor will enter bankruptcy or financial re-organization or the disappearance of an active market for a security.

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset’s carrying amount and the present value of estimated future cash flows, discounted at the financial asset’s original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in earnings.
Financial liabilities and equity instruments issued by the Company
Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognized in earnings. The net gain or loss recognized in earnings incorporates any interest paid on the financial liability and is included in the “other income and expenses” line item in the consolidated statements of earnings.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

Other financial liabilities, including long term debt, are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

Use of Estimates and Judgments
The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Consequently, actual results could differ from those estimates. Those estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected. Significant estimates include the determination of the allowance for doubtful accounts for trade receivables, provision for inventory obsolescence, the useful life of property, plant and equipment for depreciation, amortization and evaluation of net recoverable amount of property, plant and equipment, determination of fair value for share-based compensation, evaluating deferred income tax assets and liabilities, the determination of fair value of financial instruments and the likelihood of recoverability determination of implied fair value of goodwill and implied fair value of assets and liabilities for purchase price allocation purposes and goodwill impairment test purposes.

Significant items requiring the use of judgment in application of accounting policies and assumptions include the determination of the Canadian dollar as the functional currency, classification of financial instruments, classification of leases, application of the percentage of completion method on long-term contracts, degree of componentization applied when calculating amortization of property, plant and equipment, and identification of cash generating units for impairment testing purposes.

Operating Segments
An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company’s other components. The Company reviewed its operations and determined that it operates a single reportable segment, the television broadcast equipment market. The single reportable operating segment derives its revenue from the sale of hardware and software solutions including related services, training and commissioning.

Non-current assets held for sale
Non-current assets that are expected to be recovered primarily through sale rather than through continuing use are classified as held for sale and are not depreciated. Immediately before classification as held for sale, the assets are remeasured in accordance with the Company’s accounting policies. The assets are measured at the lower of their carrying amount and fair value less cost to sell. Impairment losses on initial classification as held for sale and subsequent gains or losses on remeasurement are recognized in profit or loss. Gains are not recognized in excess of any cumulative impairment loss.

NEW AND REVISED IFRSs ISSUED BUT NOT YET EFFECTIVE
Following is a listing of amendments, revisions and new International Financial Reporting Standards (IFRSs) issued but not effective until annual periods beginning after May 1, 2012. Unless otherwise indicated, earlier application is permitted.
Financial Instruments
IFRS 9 Financial instruments (“IFRS 9”) was issued by the IASB on November 12, 2009 and will replace IAS 39 Financial Instruments: Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2015. The Company has not yet determined the impact of IFRS 9 on its financial statements.

Consolidated Financial Statements
IFRS 10, Consolidated Financial Statements (“IFRS 10”) establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. IFRS 10 replaces the consolidation requirements in SIC-12, Consolidation – Special Purpose Entities and IAS 27, Consolidated and Separate Financial Statements. IFRS 10 is effective for annual periods beginning on or after January 1, 2013. The Company has not yet determined the impact of IFRS 10 on its financial statements.

Joint Arrangements
IFRS 11, Joint Arrangements (“IFRS 11”) provides a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form as is currently the case. IFRS 11 replaces SIC-13, Jointly Controlled Entities – Non-Monetary Contribution by Venturers and IAS 31, Interests in Joint Ventures. IFRS 11 is effective for annual periods beginning on or after January 1, 2013. The Company has not yet determined the impact of IFRS 11 on its financial statements.

Disclosure of Interests in Other Entities
IFRS 12, Disclosure of Interests in Other Entities (“IFRS 12”) is a new and comprehensive standard on disclosure requirements for all forms of interests in other entities, including subsidiaries, joint arrangements, associates and unconsolidated structured entities. IFRS 12 is effective for annual periods beginning on or after January 1, 2013. The Company has not yet determined the impact of IFRS 12 on its financial statements.

Fair Value Measurements
IFRS 13, Fair Value Measurements (“IFRS 13”) provides new guidance on fair value measurement and disclosure requirements. IFRS 13 is effective for annual periods beginning on or after January 1, 2013. The Company has not yet determined the impact of IFRS 13 on its financial statements.

Income Taxes
The amendments to IAS 12, Income Taxes (“IAS 12”) relate to the measurement of deferred taxes for investment property carried at fair value. IFRS 12 is effective for annual periods beginning on or after January 1, 2012. The Company has not yet determined the impact of the changes to IAS 12 on its financial statements.

Presentation of Financial Statements
Amendments to IAS 1, Presentation of Financial Statements (“IAS 1”), which are effective for annual periods beginning on or after July 1, 2012, are to be applied retroactively. The amendments require that an entity present separately the items of other comprehensive income that may be reclassified to profit or loss in the future from those that would never be reclassified to profit or loss. The Company has not yet determined the impact of the changes to IAS 1 on its financial statements.

YEAR END HIGHLIGHTS
Revenue decreased by 5% for the year ended April 30, 2012 when compared to the same period ended April 30, 2011.

Net earnings for the year ended April 30, 2012 were $60.0 million as compared to $78.3 million for the year ended April 30, 2011, a decrease of 24%. Fully-diluted earnings per share were $0.81 for the year ended April 30, 2012 as compared to $1.04 for the year ended April 30, 2011.
Gross margin during the year ended April 30, 2012 was 56.6% as compared to 57.7% for the year ended April 30, 2011.

Selling and administrative expenses for the year ended April 30, 2012 was $47.1 million compared to the year ended April 30, 2011 of $37.6 million. As a percentage of revenue, selling and administrative expenses totaled 16.1% for the year ended April 30, 2012 as opposed to 12.1% for the year ended April 30, 2011.

Research and development ("R&D") expenses increased by $8.5 million or approximately 24% compared to the year ended April 30, 2011.

Cash and instruments held for trading were $185.7 million and working capital was $325.7 million as at April 30, 2012 as compared to cash and instruments held for trading of $192.0 million and working capital of $326.0 million as at April 30, 2011.

*financial data prior to May 1, 2010, the date of transition to IFRS, is presented under Canadian GAAP.

**REVENUE AND EXPENSES**

**REVENUE**

The Company generates revenue principally from the sale of its broadcast equipment solutions to content creators, broadcasters, specialty channels and television service providers.

The Company markets and sells its products and services through both direct and indirect sales strategies. The Company’s direct sales efforts focus on large and complex end-user customers. These customers have long sales cycles typically ranging from four to eight months before an order may be received by the Company for fulfillment.
The Company monitors revenue performance in two main geographic regions: (i) United States/Canada and (ii) International.

The Company currently generates approximately 45% to 55% of its revenue in the United States/Canada. The Company recognizes the opportunity to more aggressively target markets in other geographic regions and intends to invest in personnel and infrastructure in those markets.

While a significant portion of the Company’s expenses are denominated in Canadian dollars, the Company collects substantially all of its revenues in currencies other than the Canadian dollar and therefore has significant exposure to fluctuations in foreign currencies, in particular the US dollar. Approximately 65-75% of the Company’s revenues are denominated in US dollars.

### REVENUE

<table>
<thead>
<tr>
<th></th>
<th>Year Ended April 30,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2012</td>
</tr>
<tr>
<td>United States/Canada</td>
<td>$149,884</td>
</tr>
<tr>
<td>International</td>
<td>143,516</td>
</tr>
<tr>
<td><strong>Total revenue</strong></td>
<td><strong>$293,400</strong></td>
</tr>
</tbody>
</table>

Total revenue for the year ended April 30, 2012 was $293.4 million, a decrease of 5.1% or $15.9 million as compared to revenue of $309.3 million for the year ended April 30, 2011.

Revenue in the United States/Canada region decreased to $149.9 million for the year ended April 30, 2012, a decrease of 12.9% or $22.2 million as compared to revenue of $172.1 million for the year ended April 30, 2011.

Revenue in the International region increased to $143.5 million for the year ended April 30, 2012, an increase of 4.6% or $6.4 million as compared to revenue of $137.1 million for the year ended April 30, 2011.

### Cost of Sales

Cost of sales consists primarily of costs of manufacturing and assembly of products. A substantial portion of these costs is represented by components and compensation costs for the manufacture and assembly of products. Cost of sales also includes related overhead, certain depreciation, final assembly, quality assurance, inventory management and support costs. Cost of sales also includes the costs of providing services to clients, primarily the cost of service-related personnel.

### GROSS MARGIN

<table>
<thead>
<tr>
<th></th>
<th>Year Ended April 30,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2012</td>
</tr>
<tr>
<td>Gross margin</td>
<td>$166,168</td>
</tr>
<tr>
<td>Gross margin % of sales</td>
<td>56.6%</td>
</tr>
</tbody>
</table>

Gross margin for the year ended April 30, 2012 was $166.2 million, compared to $178.3 million for the year ended April 30, 2011. As a percentage of revenue, the gross margin was 56.6% for the year ended April 30, 2012, as compared to 57.7% for the year ended April 30, 2011.

Gross margins vary depending on the product mix, geographic distribution and competitive pricing pressures. For the year ended April 30, 2012 the gross margin, as a percentage of revenue, was in the Company’s projected range. The pricing environment continues to be very competitive with substantial discounting by our competition.
The Company expects that it will continue to experience competitive pricing pressures. The Company continually seeks to build its products more efficiently and enhance the value of its product and service offerings in order to reduce the risk of declining gross margin associated with the competitive environment.

**Operating Expenses**

The Company’s operating expenses consist of: (i) selling, administrative and general; (ii) research and development and (iii) foreign exchange.

Selling expenses primarily relate to remuneration of sales and technical personnel. Other significant cost components include trade show costs, advertising and promotional activities, demonstration material and sales support. Selling and administrative expenses relate primarily to remuneration costs of related personnel, legal and professional fees, occupancy and other corporate and overhead costs. The Company also records certain depreciation amortization and share based compensation charges as general expenses. For the most part, selling, administrative and general expenses are fixed in nature and do not fluctuate directly with revenue. The Company’s selling expenses tend to fluctuate in regards to the timing of trade shows, sales activity and sales personnel.

The Company invests in research and development to maintain its position in the markets it currently serves and to enhance its product portfolio with new functionality and efficiencies. Although the Company’s research and development expenditures do not fluctuate directly with revenues, it monitors this spending in relation to revenues and adjusts expenditures when appropriate. Research and development expenditures consist primarily of personnel costs and material costs. Research and development expenses are presented on a gross basis (without deduction of research and development tax credits). Research and development tax credits associated with research and development expenditures are shown separately under research and development tax credits.

### SELLING AND ADMINISTRATIVE

<table>
<thead>
<tr>
<th></th>
<th>Year Ended April 30,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2012</td>
</tr>
<tr>
<td>Selling and administrative</td>
<td>$ 47,118</td>
</tr>
<tr>
<td>Selling and administrative % of sales</td>
<td>16.1%</td>
</tr>
</tbody>
</table>

Selling and administrative expenses excludes stock based compensation, operation of non-production property, plant and equipment, and amortization of intangibles. Selling and administrative expenses for the year ended April 30, 2012 were $47.1 million or 16.1% of revenue as compared to selling and administrative expenses of $37.6 million or 12.1% of revenue for the year ended April 30, 2011.

The increase of $9.5 million for the year was a result of increased sales staff and sales activity to support International sales and new product introductions, inclusion of Pharos for the full year and general overhead increases including bad debt expense of $1.3 million.

### RESEARCH AND DEVELOPMENT (R&D)

<table>
<thead>
<tr>
<th></th>
<th>Year Ended April 30,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2012</td>
</tr>
<tr>
<td>Research and development expenses</td>
<td>$ 44,200</td>
</tr>
<tr>
<td>Research and development % of sales</td>
<td>15.1%</td>
</tr>
</tbody>
</table>

For the year ended April 30, 2012, gross R&D expenses increased to $44.2 million, an increase of 23.7% or $8.5 million as compared to an expense of $35.7 million for the year ended April 30, 2011.

The increase of $8.5 million was predominantly a result of planned growth of R&D personnel, the inclusion of Pharos for the full year and the corresponding increase in materials, prototypes and general overhead expenses.
Foreign Exchange
For the year ended April 30, 2012, the foreign exchange gain was $2.3 million as compared to a foreign exchange loss for the same period ended April 30, 2011 of $2.6 million.

Finance Income, Costs and Other Income
For the year ended April 30, 2012, finance income, costs and other income netted to a gain of $1.6 million.

</tr>
</tbody>
</table>

Operating Activities
For the year ended April 30, 2012, the Company generated cash from operations of $66.6 million, compared to $73.7 million for the year ended April 30, 2011. Excluding the effects of the changes in non-cash working capital, the Company generated cash from operations of $73.0 million for the year ended April 30, 2012, compared to $88.1 million for the year ended April 30, 2011.

Investing Activities
The Company used cash from investing activities of $12.1 million for the year ended April 30, 2012 which was predominantly the acquisition of capital assets of $16.6 million, compared to cash used of $7.5 million for the year ended April 30, 2011.

Financing Activities
For the year ended April 30, 2012, the Company used cash from financing activities of $56.2 million, which was principally driven by a repurchase of capital stock costing $25.9 million, dividends paid of $36.9 million and offset by the issuance of capital stock pursuant to the Company Stock Option Plan of $7.6 million.

WORKING CAPITAL
As at April 30, 2012, the Company had cash and instruments held for trading of $185.7 million, compared to $192.0 million at April 30, 2011.

The Company had working capital of $325.7 million as at April 30, 2012 compared to $326.0 million as at April 30, 2011.
The Company believes that the current balance in cash and instruments held for trading plus future cash flow from operations will be sufficient to finance growth and related investment and financing activities in the foreseeable future.

Day sales outstanding in accounts receivable were 77 days at April 30, 2012 as compared to 62 for April 30, 2011.

SHARE CAPITAL STRUCTURE
Authorized capital stock consists of an unlimited number of common and preferred shares.

</tbody>
</table>

FINANCIAL INSTRUMENTS
The Company’s financial instruments consist of cash, instruments held for trading, accounts receivable and accounts payable and accrued liabilities and long term debt. Unless otherwise noted, it is management’s opinion that the Company is not exposed to significant interest or credit risks arising from these financial instruments. The Company estimates that except for instruments held for trading, the fair value of these instruments approximate the carrying values due to their short-term nature.

Fair values and classification of financial instruments:
The following summarizes the significant methods and assumptions used in estimating the fair values of financial instruments:

   I. The fair values of instruments held for trading is maintained level one hierarchy and are determined by the quoted market values for each of the investments in an active market at the reporting date. Gains and losses are included in interest and other income.

   II. Contingent consideration is level three hierarchy. Liability has not changed since the acquisition.

   III. The carrying amounts of cash, accounts receivable, trade and other payables approximate their fair value due to the short-term nature of these financial instruments. The carrying amount of long term debt approximates its fair value as it incurs interest at a variable rate adjusted for changes in the market rate.

The Company invests in marketable securities that are traded in an active market. Generally the investment is limited to no more than 15% of the total cash and instruments held for trading.

CONTRACTUAL OBLIGATIONS
The following table sets forth the Company’s contractual obligations as at April 30, 2012:

<table>
<thead>
<tr>

OFF-BALANCE SHEET FINANCING
The Company does not have any off-balance sheet arrangements.

RELATED PARTY TRANSACTIONS
In the normal course of business, we may enter into transactions with related parties. These transactions occur under market terms consistent with the terms of transactions with unrelated arms-length third parties. The Company continues to lease a premise from a company in which two shareholders each indirectly hold a 10% interest, continues to lease a facility from a company in which two shareholders each indirectly hold a 20% interest, continues to lease a facility for manufacturing where two shareholders indirectly own 100% interest, continues to lease a facility from a company in which two shareholders each indirectly own a 35% interest and continues to lease a facility with a director who indirectly owns 100%.

SELECTED CONSOLIDATED QUARTERLY FINANCIAL INFORMATION
The following table sets out selected consolidated financial information for each of the eight quarters ended April 30, 2012. In the opinion of management, this information has been prepared on the same basis as the audited consolidated financial statements. The operating results for any quarter should not be relied upon as any indication of results for any future period.

The Companies revenue and corresponding earnings can vary from quarter to quarter depending on the delivery requirements of our customers. Our customers can be influenced by a variety of factors including upcoming sports or entertainment events as well as their access to capital. Net earnings represents net earnings attributable to shareholders.
DISCLOSURE CONTROLS AND PROCEDURES
Management, including the Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company’s disclosure controls and procedures (as defined in Multilateral Instrument 52-109 of the Canadian Securities Administrators) as of April 30, 2012.

Management has concluded that, as of April 30, 2012, the Company’s disclosure controls and procedures were effective to provide reasonable assurance that material information relating to the Company would be made known to them by others within the Company, particularly during the period in which this report was being prepared.

INTERNAL CONTROLS OVER FINANCIAL REPORTING
Management is responsible for and has designed internal controls over financial reporting, or caused it to be designed under management’s supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. Management has concluded that, as of April 30, 2012, the Company’s internal controls over financial reporting were effective to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS.

CHANGES IN INTERNAL CONTROLS OVER FINANCIAL REPORTING
There have been no changes to the Company’s internal controls over financial reporting during the period ended April 30, 2012 that have materially affected, or reasonably likely to materially affect, its internal controls over financial reporting.

FIRST-TIME ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS
For all periods up to and including the year ended April 30, 2011, the Company prepared its financial statements in accordance with Canadian GAAP. These financial statements, for the year ended April 30, 2012, are the first annual financial statements which the Company has prepared in accordance with IFRS.

Accordingly, the Company has prepared financial statements which comply with IFRS applicable for periods beginning on or after May 1, 2010 (the date of transition) as described in the significant accounting policies in Note 2 of the consolidated financial statements. The principal adjustments made by the Company in its reconciling from Canadian GAAP balance sheet as at May 1, 2010 and its previously published Canadian GAAP financial statements for the year ended April 30, 2011 to IFRS as described below.

Exemptions applied and mandatory exceptions
IFRS 1, First-Time Adoption of International Financial Reporting Standards, allows first-time adopters certain exemptions from the general requirement to apply IFRS as effective for April 2012 year ends retrospectively. IFRS 1 also includes mandatory exceptions to the retrospective application of IFRSs.

The Company has applied the following exemptions:

IFRS 2 - Share-based payment transactions
IFRS 1 does not require first-time adopters to apply IFRS 2, Share Based Payment, to equity instruments that were granted on or before November 7, 2002, or equity instruments that were granted subsequent to November 7, 2002 and vested before the date of transition to IFRS. The Company has elected not to apply IFRS 2 to awards that vested prior to May 1, 2010, which had been accounted for in accordance with Canadian GAAP.

IFRS 3 - Business Combinations
IFRS 1 indicates that a first-time adopter may elect not to apply IFRS 3, Business Combinations, retrospectively to business combinations that occurred before the date of transition to IFRS. The Company has taken advantage of this election and has applied IFRS 3 to business combinations that occurred on or after May 1, 2010. In accordance with the IFRS 1 exemption the Company has also elected to not retroactively apply IAS 21, The Effects of Changes in Foreign Exchange Rates, on fair value adjustments and goodwill arising in business combinations that occurred before May 1, 2010.
IAS 21 - Cumulative translation differences

IFRS 1 provides the option to reset the balance of the cumulative foreign currency translation adjustment to zero on the date of transition. The Company has chosen to apply this election and has eliminated the cumulative translation difference and has adjusted retained earnings by the same amount at the date of transition to IFRS. If, subsequent to adoption, a foreign operation is disposed of, the translation differences that arose before the date of transition to IFRS will not affect the gain or loss on disposal.

The Company has applied the following mandatory exceptions:

IFRS 1 - Estimates
In accordance with IFRS 1, an entity’s estimates under IFRS at the date of transition to IFRS must be consistent with estimates made for the same date under previous GAAP, unless there is objective evidence that those estimates were in error. The Company’s IFRS estimates as of May 1, 2010 are consistent with its Canadian GAAP estimates for the same date.

Other exceptions
The three remaining mandatory exceptions to the retrospective application of IFRSs relate to the de-recognition of financial assets and liabilities, hedge accounting and assets classified as held for sale and discontinued operations. The Company has determined that these mandatory exceptions have not had a material impact on the consolidated financial statements.

IFRS employs a conceptual framework that is similar to Canadian GAAP. However, significant differences exist in certain matters of recognition, measurement and disclosure. While adoption of IFRS has not changed the Company’s actual cash flows, it has resulted in changes to the Company’s reported financial position and results of operations. In order to allow the users of the financial statements to better understand these changes, the Company’s Canadian GAAP statement of earnings, statement of comprehensive income, statement of financial position and statement of cash flows for the year ended April 30, 2011 have been reconciled to IFRS, with the resulting differences explained.

Notes to the financial statement reconciliations

(1) The Company has retroactively applied IAS 16, Property, Plant and Equipment, which requires the Company to identify the significant components of its property, plant and equipment and depreciate these parts separately over their respective useful lives. The impact of the retroactive application of the increased componentization has resulted in an increase in the net book value of capital assets and retained earnings at the date of transition and an increase in subsequent amortization expense.

(2) IAS 37, Provisions, Contingent Liabilities and Contingent Assets, requires separate disclosure of provisions on the face of the statement of financial position. This was not required under previous Canadian GAAP; therefore, all provisions were reclassified from accounts payable and accrued liabilities upon transition. Additionally, provisions as at May 1, 2010, as reported under Canadian GAAP, were re-assessed in accordance with the provisions of IAS 37. As a result of measurement differences between Canadian GAAP and IFRS, the Company increased its provision for site restoration costs.

(3) IAS 11, Construction Contracts, requires revenues on projects which meet the definition of a construction contract to be measured using the percentage of completion method. The Company has identified certain long-term contracts which meet the definition of construction contracts for which no revenues were previously recognized until shipment and transfer of title to customers were completed. The recognition method relating to these contracts has been restated to reflect the percentage of completion method.

(4) The Company has elected under IFRS 1 not to apply IFRS 3 retrospectively to business combinations that occurred prior to May 1, 2010. Accordingly, the Company has continued with the same accounting treatment for business combinations completed before that time under Canadian GAAP. For all business combinations that occurred on and subsequent to May 1, 2010 all business acquisitions were accounted for in accordance with IFRS 3. Under IFRS 3 all acquisition related transaction costs are expensed as incurred, as opposed to Canadian GAAP where the costs are capitalized during the purchase price allocation. Acquisitions during the year ended April 30, 2011 resulted in $172 in acquisition related transaction costs.

(5) IAS 12, Income Taxes, requires net deferred income tax assets and liabilities to be adjusted for the tax effects of revaluating foreign currency denominated non-monetary balances held by entities where the functional currency is different than the local tax currency. As this was not a requirement under Canadian GAAP, an adjustment is required upon transition.

(6) Under IFRS, any liabilities or assets relating to a non-controlling interest are required to be classified as equity and presented separately from the equity attributable to shareholders of the Company. As such, the liabilities associated with the non-controlling interest have been reclassified within the statement of financial position.

(7) Under IFRS all deferred tax balances are required to be classified as non-current, regardless of the classifications of the underlying assets or liabilities, or the expected reversal date of the temporary differences. The reclassification of all deferred tax balances to non-current also impacts the netting of deferred tax assets and liabilities within or between the taxable entities of the Company.

(8) Under IFRS future forfeiture rates relating to the percentage of options that will not vest must be estimated and recorded as a reduction in stock compensation expense. Under Canadian GAAP forfeitures are recognized and used as a reduction in the expense as incurred. As such, the Company has retroactively estimated forfeiture rates for all options vesting subsequent to the translation date and retroactively adjusted cumulative stock compensation expense.

(9) Given the change in guidance noted above under IAS 11, Construction Contracts, and other factors, deferred revenue has been determined to be a material balance requiring segregation on the balance sheet. As such, deferred revenue has been reclassified from accounts payable to its own line item.

(10) Under the requirements of IAS 21, the Company is required to assess the functional currency of all subsidiary entities no matter where the entity resides. Upon the review upon transition it was concluded a subsidiary previously accounted for as an integrated operation has a functional currency different from the parent. The impact of the adjustment has resulted in the reclassification of prior year foreign exchange adjustments from foreign exchange expense to the cumulative translation adjustment within comprehensive income.

(11) Under the requirements of IAS 21, the Company is required to assess the functional currency of all subsidiary entities no matter where the entity resides. Upon transition it was concluded an entity previously accounted for as a self-sustaining operation has a functional currency consistent with the parent. As noted under discussions related to IFRS 3, the Company has taken the IFRS 3 exemption to maintain goodwill at its historical cost. The impact of the adjustment has resulted in an adjustment of goodwill ensuring it is maintained at its historical translation rate as opposed to the spot rate used under Canadian GAAP.

(12) As noted under discussions relating to IAS 21, the Company has elected to apply the IFRS 1 election allowing for the resetting of the cumulative translation adjustment balance as at May 1, 2010 to zero.
Reconciliation of consolidated cash flows
There are no material differences between the statement of cash flows presented under IFRS and the statement of cash flows under Canadian GAAP.

HIGHLIGHTS FROM THE FOURTH QUARTER
Revenue increased by $7.3 million or 11% for the three months ended April 30, 2012 when compared to the same period ended April 30, 2011. Revenue increased in the International region by 42%. Revenue decreased in the United States/Canada region by 11%.

Fully diluted EPS was $0.18 for the three months ended April 30, 2012 as compared to $0.16 for the period ended April 30, 2011.

Selling and administrative expenses increased by $1.9 million for the three months ended April 30, 2012 when compared to the same period ended April 30, 2011. Selling and administrative expenses were approximately 16% of revenue for the three months ended April 30, 2012 as compared to approximately 15% of revenue for the same period ended April 30, 2011.

Research and development expenses increased by $2.9 million for the three months ended April 30, 2012 when compared to the same period ended April 30, 2011. Research and development expenses represented approximately 17% of revenue for the three months ended April 30, 2012 as compared to approximately 14% for the same period ended April 30, 2011.

The Company’s scientific research tax credits were $2.6 million for the three months ended April 30, 2012 as compared to $2.3 million for the three months ended April 30, 2011.

OUTLOOK
Management expects on an annual basis that the Company’s revenues will continue to outpace the industry growth. Gross margin percentages may vary depending on the mix of products sold, the Company’s success in winning more complete projects, utilization of manufacturing capacity and the competitiveness of the pricing environment. R&D will continue to be a key focus as the Company invests in new product development.

RISKS AND UNCERTAINTIES
The Company risk factors are outlined in our AIF filed on SEDAR.
INDEPENDENT AUDITOR’S REPORT
To the Shareholders of Evertz Technologies Limited

We have audited the accompanying consolidated financial statements of Evertz Technologies Limited, which comprise the consolidated statements of financial position as at April 30, 2012, April 30, 2011 and May 1, 2010, and the consolidated statements of changes in equity, earnings, comprehensive income and cash flows for the years ended April 30, 2012 and April 30, 2011, and a summary of significant accounting policies and other explanatory information.

Management’s Responsibility for the Consolidated Financial Statements
Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor’s Responsibility
Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Evertz Technologies Limited as at April 30, 2012, April 30, 2011 and May 1, 2010, and its financial performance and its cash flows for the years ended April 30, 2012 and April 30, 2011 in accordance with International Financial Reporting Standards.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years ended April 30, 2012 and 2011 (in thousands of Canadian dollars, except for “number of common shares” and “number of options”)

EVERTZ TECHNOLOGIES LIMITED (“EVERTZ” OR THE “COMPANY”) IS INCORPORATED UNDER THE CANADA BUSINESS CORPORATIONS ACT. THE COMPANY IS INCORPORATED AND DOMICILED IN CANADA AND THE REGISTERED HEAD OFFICE IS LOCATED AT 5292 JOHN LUCAS DRIVE, BURLINGTON, ONTARIO, CANADA. THE COMPANY IS A LEADING EQUIPMENT PROVIDER TO THE TELEVISION BROADCAST INDUSTRY. THE COMPANY DESIGNS, MANUFACTURES AND DISTSributes VIDEO AND AUDIO INFRASTRUCTURE EQUIPMENT FOR THE PRODUCTION, POST-PRODUCTION, BROADCAST AND TELECOMMUNICATIONS MARKETS.

1. STATEMENT OF COMPLIANCE

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”). As these are the Company’s first annual financial statements prepared in accordance with IFRS, they have been prepared in accordance with IFRS 1 “First-time Adoption of International Financial Reporting Standards”.

Prior to the adoption of IFRS, the Company prepared its annual financial statements in accordance with Canadian generally accepted accounting principles (“Canadian GAAP”). Subject to certain transition elections disclosed in note 24, the Company has consistently applied the same accounting policies in its opening IFRS statement of financial position at May 1, 2010 (the “transition date”) and throughout all periods presented, as if these policies had always been in effect. Note 24 discloses the impact of the transition to IFRS on the Company’s reported financial position, financial performance and cash flows, including the nature and effect of significant changes in accounting policies from those used in the Company’s consolidated financial statements for the year ended April 30, 2011, reported in accordance with Canadian GAAP.

These consolidated financial statements were authorized for issue by the Board of Directors on June 13, 2012.

2. SIGNIFICANT ACCOUNTING POLICIES

Outlined below are those policies considered particularly significant:

Basis of Measurement

These financial statements have been prepared on the historical cost basis except for certain financial assets and liabilities which are stated at fair value. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Functional and Presentation Currency

These financial statements are presented in Canadian dollars, which is the Company’s functional currency. All financial information presented in Canadian dollars has been rounded to the nearest thousand.

Basis of Consolidation

These financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of are included in the consolidated statements of earnings and comprehensive income from the effective date of acquisition and up to the effective date of disposal, as appropriate. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

All intra-Company transactions, balances, income and expenses are eliminated in full on consolidation.

Business Combinations

Business combinations are accounted for using the acquisition method. The cost of the acquisition is measured at the aggregate of the fair values, at the date of acquisition, of assets transferred, liabilities incurred or assumed, and equity instruments issued by the Company. The acquiree’s identifiable assets and liabilities assumed are
2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

recognized at their fair value at the acquisition date. Acquisition-related costs are recognized in earnings as incurred. Any contingent consideration is measured at fair value on date of the acquisition and is included as part of the consideration transferred. The fair value of the contingent consideration liability is re-measured at each reporting date with corresponding gain/loss recognized in earnings. The excess of the consideration over the fair value of the net identifiable assets and liabilities acquired is recorded as goodwill.

On an acquisition by acquisition basis, any non-controlling interest is measured either at the fair value of the non-controlling interest or at the fair value of the proportionate share of the net identifiable assets acquired. Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

Revenue Recognition

Revenue is measured at the fair value of consideration received or receivable, net of discounts and after eliminating intercompany sales.

Where revenue arrangements have separately identifiable components, the consideration received or receivable is allocated to each identifiable component and the applicable revenue recognition criteria are applied to each of the components.

Revenue is derived from the sale of hardware and software solutions including related services, training and commissioning. Revenue from sales of hardware and software are recognized upon shipment, provided that the significant risks and rewards of ownership have been transferred to the customer, the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, revenue can be reliably measured and its probable that the economic benefits will flow to the Company. Service revenue is recognized as services are performed.

Certain of the Company’s contracts are long-term in nature. When the outcome of the contract can be assessed reliably, the Company recognizes revenue on long-term contracts using the percentage of completion method, based on costs incurred relative to the estimated total contract costs. When the outcome of the contract cannot be assessed reliably contract costs incurred are immediately expensed and revenue is recognized only to the extent that costs are considered likely to be recovered.

Interest revenue

Interest revenue is recognized when it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably. Interest revenue is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset’s net carrying amount on initial recognition.

Cash and cash equivalents

Cash and cash equivalents include cash on hand and in the bank, net of outstanding bank overdrafts.

Inventories

Inventories consist of raw materials, work in progress and finished goods. Inventories are stated at the lower of cost and net realizable value. Cost is determined on a weighted average basis and includes raw materials, the cost of direct labour applied to the product and the overhead expense.

Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any recognized impairment loss. Where the costs of certain components of an item of property, plant and equipment are significant in relation to the
2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

total cost of the item, they are accounted for and depreciated separately. Depreciation expense is calculated based on
depreciable amounts which is the cost of an asset less residual value and is recognized in earnings on a straight-line
basis over the estimated useful life of the related asset. Borrowing costs are capitalized to the cost of qualifying assets
that take a substantial period of time to be ready for their intended use.

The estimated useful lives are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Basis</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office furniture and equipment</td>
<td>Straight-line</td>
<td>10 years</td>
</tr>
<tr>

<td>Straight-line</td>
<td>5 years</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>Straight-line</td>
<td>5 - 15 years</td>
</tr>
<tr>
<td>Leaseholds</td>
<td>Straight-line</td>
<td>5 years</td>
</tr>
<tr>
<td>Building</td>
<td>Straight-line</td>
<td>10 - 40 years</td>
</tr>
<tr>
<td>Airplanes</td>
<td>Straight-line</td>
<td>10 - 20 years</td>
</tr>
</tbody>
</table>

The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales
proceeds and the carrying amount of the asset and is recognized in earnings.

The Company reviews the residual value, estimated useful life and the depreciation method at each reporting period.

Impairment of non-financial assets

Goodwill is tested for impairment annually, or whenever events or changes in circumstances indicate that the carrying
amount may be more than its recoverable amount. At each reporting period, the Company reviews the carrying
amounts of its other non-financial assets to determine whether there is any indication that those assets have suffered
an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to
determine the extent of the impairment loss (if any). Where the asset does not generate cash inflows that are largely
independent from other assets, the Company estimates the recoverable amount of the cash-generating unit (“CGU”)
to which the asset belongs. Goodwill is allocated to a group of CGU’s based on the level at which it is monitored for
internal reporting purposes.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the
estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current
market assessments of the time value of money and the risks specific to the asset for which the estimates of future
cash flows have not been adjusted.

If the recoverable amount of an asset or CGU is estimated to be less than its carrying amount, the carrying amount
of the asset or CGU is reduced to its recoverable amount. An impairment loss relating to a CGU to which goodwill has
been allocated, is allocated to the carrying amount of the goodwill first. An impairment loss is recognized immediately
in earnings.

An impairment loss in respect of goodwill is not reversed. Where an impairment loss subsequently reverses for other
non-financial assets, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable
amount, but so that the increased carrying amount does not exceed the carrying amount that would have been
determined had no impairment loss been recognized for the asset or CGU in prior years. A reversal of an impairment
loss is recognized immediately in earnings.

Intangible Assets

Intangible assets represent intellectual property acquired through business acquisitions and are recorded at cost less
any impairment loss and are amortized using the straight–line method over a four–year period. The estimated useful
life and amortization method are reviewed at the end of each reporting period.
2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Research and development
All research and development expenditures are expensed as incurred unless a development project meets the criteria for capitalization. Development expenditures are capitalized only if development costs can be measured reliably, the product of process is technically and commercially feasible, future economic benefits are probable and the Company intends to and has sufficient resources to complete development and to use or sell the asset. No internally generated intangible assets have been recognized to date.

Research and development expenditures are reduced by investment tax credits and related government grants. Investment tax credits for scientific research and experimental development are recognized in the period the qualifying expenditures are incurred if there is reasonable assurance that they will be realized.

Provisions
Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Leasing
Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Assets held under finance leases are recognised as assets of the Company at their fair value or, if lower, at the present value of the minimum lease payments, each determined at the inception of the lease. The corresponding liability to the lessor is included in the Statement of financial position as a finance lease obligation.

Rentals payable under operating leases are charged to earnings on a straight-line basis over the term of the relevant lease.

Foreign Currency Translation
The individual financial statements of each subsidiary entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each group entity are presented in Canadian dollars (‘CDN’), which is the functional currency of the parent Company and the presentation currency for the financial statements.

In preparing the financial statements of the individual entities, transactions in currencies other than the entity’s functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences are recognized in earnings in the period in which they arise. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Company’s foreign operations are expressed in Canadian dollars using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the period. Foreign currency gains and losses are recognized in other comprehensive income. The relevant amount in cumulative foreign currency translation adjustment is reclassified into earnings upon disposition or partial disposition of a foreign operation and attributed to non-controlling interests as appropriate.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONT’D)
Years ended April 30, 2012 and 2011 (in thousands of Canadian dollars, except for “number of common shares” and “number of options”)

2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)
Income Taxes
Current tax
The tax currently payable is based on taxable profit for the year. Taxable profit differs from net earnings as reported in the statement of earnings because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company’s liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the statement of financial position date.

Deferred tax
Deferred tax is the tax expected to be payable or recoverable on unused tax losses and credits, as well as differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which unused tax losses, credits and other deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realized. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax is charged or credited to earnings, except when it relates to items charged or credited directly to other comprehensive income or equity, in which case the deferred tax is also dealt with in other comprehensive income or equity.

Share Based Compensation
Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 16.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period of the option based on the Company’s estimate of the number of equity instruments that will eventually vest. At each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognized in earnings such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to share based payment reserve.

Earnings per Share
The Company presents basic and diluted earnings per share (EPS) data for its common shares. Basic EPS is calculated by dividing the net earnings attributable to shareholders by the weighted average number of common shares outstanding during the period. Diluted EPS is determined by adjusting the net earnings attributable to shareholders and the weighted average number of common shares outstanding for the effects of all potentially dilutive common shares, which is comprised of share options granted to employees with an exercise price below the average market price.

Borrowing Costs
Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.
2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

All other borrowing costs are recognized in earnings in the period in which they are incurred.

Investment Tax Credits

The Company is entitled to investment tax credits, which are earned as a percentage of eligible research and development expenditures incurred in each taxation year. Investment tax credits relate entirely to the Company’s research and development expenses in the consolidated statement of earnings but are presented separately in the consolidated statement of earnings for information purposes. Investment tax credits are recognized when there is reasonable assurance they will be received.

Financial Instruments

The Company’s financial assets and liabilities which are initially recorded at fair value and subsequently measured based on their assigned classifications as follows:

<table>
<thead>
<tr>
<th>Asset/Liability</th>
<th>Category</th>
<th>Measurement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash and cash equivalents</td>
<td>Loans and receivables</td>
<td>Amortized cost</td>

</tr>
<tr>
<td>Long term debt</td>
<td>Other liabilities</td>
<td>Amortized cost</td>
</tr>
<tr>
<td>Contingent consideration</td>
<td>Fair value through profit or loss</td>
<td>Fair value</td>
</tr>
</tbody>
</table>

Financial Assets

All financial assets are initially measured at fair value, plus transaction costs, except for those financial assets classified as fair value through profit or loss, which are initially measured at fair value.

Financial assets are classified into the following specific categories: financial assets “at fair value through profit or loss” (FVTPL), “held-to-maturity” investments, “available-for-sale” (AFS) financial assets and “loans and receivables”. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognized in earnings.

Transaction costs in respect of financial instruments are fair value through profit or loss are recognized in earnings immediately. Transaction costs in respect of other financial instruments are included in the initial measurement of the financial instrument.

Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at each reporting period. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected. For certain categories of financial assets, such as trade and other receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment of a financial asset can include a significant or prolonged decline in the fair value of an asset, default or delinquency by a debtor, indication that a debtor will enter bankruptcy or financial re-organization or the disappearance of an active market for a security.

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset’s carrying amount and the present value of estimated future cash flows, discounted at the financial asset’s original effective interest rate.
2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in earnings.

Financial liabilities and equity instruments issued by the Company

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognized in earnings. The net gain or loss recognized in earnings incorporates any interest paid on the financial liability and is included in the "other income and expenses" line item in the consolidated statements of earnings.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

Other financial liabilities, including long term debt, are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

Use of Estimates and Judgments

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Consequently, actual results could differ from those estimates. Those estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected. Significant estimates include the determination of the allowance for doubtful accounts for trade receivables, provision for inventory obsolescence, the useful life of property, plant and equipment for depreciation, amortization and evaluation of net recoverable amount of property, plant and equipment, determination of fair value for share-based compensation, evaluating deferred income tax assets and liabilities, the determination of fair value of financial instruments and the likelihood of recoverability determination of implied fair value of goodwill and implied fair value of assets and liabilities for purchase price allocation purposes and goodwill impairment test purposes.

Significant items requiring the use of judgment in application of accounting policies and assumptions include the determination of the Canadian dollar as the functional currency, classification of financial instruments, classification of leases, application of the percentage of completion method on long-term contracts, degree of componentization applied when calculating amortization of property, plant and equipment, and identification of cash generating units for impairment testing purposes.

Operating Segments

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company’s other components. The Company reviewed its operations and determined that it operates a single reportable segment, the television broadcast equipment market. The single reportable operating segment derives its revenue from the sale of hardware and software solutions including related services, training and commissioning.

Non-current assets held for sale

Non-current assets that are expected to be recovered primarily through sale rather than through continuing use are classified as held for sale and are not depreciated. Immediately before classification as held for sale, the assets are remeasured in accordance with the Company’s accounting policies. The assets are measured at the lower of their carrying amount and fair value less cost to sell. Impairment losses on initial classification as held for sale and subsequent gains or losses on remeasurement are recognized in profit or loss. Gains are not recognized in excess of any cumulative impairment loss.
2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

New and Revised IFRSs Issued but Not Yet Effective

Following is a listing of amendments, revisions and new International Financial Reporting Standards (IFRSs) issued but not effective until annual periods beginning after May 1, 2012. Unless otherwise indicated, earlier application is permitted.

Financial Instruments

IFRS 9, Financial Instruments (“IFRS 9”) was issued by the IASB on November 12, 2009 and will replace IAS 39, Financial Instruments: Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2015. The Company has not yet determined the impact of IFRS 9 on its financial statements.

Consolidated Financial Statements

IFRS 10, Consolidated Financial Statements (“IFRS 10”) establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. IFRS 10 replaces the consolidation requirements in SIC-12, Consolidation – Special Purpose Entities and IAS 27, Consolidated and Separate Financial Statements. IFRS 10 is effective for annual periods beginning on or after January 1, 2013. The Company has not yet determined the impact of IFRS 10 on its financial statements.

Joint Arrangements

IFRS 11, Joint Arrangements (“IFRS 11”) provides a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form as is currently the case. IFRS 11 replaces SIC-13, Jointly Controlled Entities – Non-Monetary Contribution by Venturers and IAS 31, Interests in Joint Ventures. IFRS 11 is effective for annual periods beginning on or after January 1, 2013. The Company has not yet determined the impact of IFRS 11 on its financial statements.

Disclosure of Interests in Other Entities

IFRS 12, Disclosure of Interests in Other Entities (“IFRS 12”) is a new and comprehensive standard on disclosure requirements for all forms of interests in other entities, including subsidiaries, joint arrangements, associates and unconsolidated structured entities. IFRS 12 is effective for annual periods beginning on or after January 1, 2013. The Company has not yet determined the impact of IFRS 12 on its financial statements.

Fair Value Measurements

IFRS 13, Fair Value Measurements (“IFRS 13”) provides new guidance on fair value measurement and disclosure requirements. IFRS 13 is effective for annual periods beginning on or after January 1, 2013. The Company has not yet determined the impact of IFRS 13 on its financial statements.

Income Taxes

The amendments to IAS 12, Income Taxes (“IAS 12”) relate to the measurement of deferred taxes for investment property carried at fair value. IFRS 12 is effective for annual periods beginning on or after January 1, 2012. The Company has not yet determined the impact of the changes to IAS 12 on its financial statements.

Presentation of Financial Statements

Amendments to IAS 1, Presentation of Financial Statements (“IAS 1”), which are effective for annual periods beginning on or after July 1, 2012, are to be applied retroactively. The amendments require that an entity present separately the items of other comprehensive income that may be reclassified to profit or loss in the future from those that would never be reclassified to profit or loss. The Company has not yet determined the impact of the changes to IAS 1 on its financial statements.
3. BUSINESS ACQUISITIONS

On December 3, 2010 the Company completed the purchase of 100% of the share capital of an international technology-based company for cash consideration of $2,917, net of $1,483 in cash acquired. The acquisition price includes $1,600 in contingent consideration that the Company has determined as probable to be incurred. The acquisition was accounted for under the acquisition method and its operating results have been included in these financial statements since the date of acquisition. During fiscal 2011 the Company recognized $172 of transaction costs in selling, administrative and general expenses relating to the acquisition.

The allocation of the purchase price is based on management's estimate of the fair value of assets acquired and liabilities assumed. The allocation of the purchase price was as follows:

<table>
<thead>
<tr>
<th>Trade and other receivables</th>
<th>$2,203</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inventory</td>
<td>245</td>
</tr>
<tr>
<td>Income tax receivable</td>
<td>15</td>
</tr>
<tr>
<td>Trade and other payables</td>
<td>(1,109)</td>
</tr>
<tr>
<td>Deferred revenue</td>
<td>(2,526)</td>
</tr>
<tr>
<td>Property, plant and equipment</td>
<td>131</td>
</tr>
<tr>
<td>Intangibles - intellectual property</td>
<td>1,440</td>
</tr>
<tr>
<td>Deferred tax liability</td>
<td>(397)</td>
</tr>
<tr>
<td>Goodwill (not tax deductible)</td>
<td>2,915</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>$2,917</td>
</tr>
</tbody>
</table>

The fair value of trade and other receivables was determined by netting $2,579 in gross receivables with $376 in receivables deemed uncollectable. Goodwill recognized upon acquisition relates to expected synergies, revenue growth, future market development and the assembled workforce of the entity.

4. TRADE AND OTHER RECEIVABLES

<td><strong>$17,507</strong></td>
</tr>
</tbody>
</table>

The Company performs an impairment test annually on April 30th or whenever there is an indication of impairment. The key assumptions used in performing the impairment test at April 30, 2012 are as follows:

<table>
<thead>
<tr>
<th>Method of determining recoverable amount:</th>
<th>Value in use</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discount Rate:</td>
<td>8%</td>
</tr>
<tr>
<td>Perpetual growth rate:</td>
<td>5% to 10%</td>
</tr>
</tbody>
</table>

**Recoverable amount**

Management past experience and future expectations of the business performance is used to make a best estimate of the expected revenue, earnings before interest, taxes, depreciation and amortization ("EBITDA") and operating cash flows for a five year period. Subsequent to the fifth year period the present value of the fifth year cash flows is calculated in perpetuity.

**Discount rate**

The discount rate applied is a pretax rate that reflects the time value of money and risk associated with the business.

**Perpetual growth rate**

The perpetual growth rate is management’s current assessment of the long-term grown prospect of the Company in the jurisdictions in which it operates.

**Sensitivity analysis**

Management performs sensitivity analysis on the key assumptions. Sensitivity analysis indicates reasonable changes to key assumptions will not result in an impairment loss.

Warranty and Returns

The provision relates to estimate future costs associated with warranty repairs and returns or hardware solutions. The provision is based on historical data associated with similar products.

Lease/Retirement Obligations

The provision relates to estimate restoration costs expected to be incurred upon the conclusion of company leases.
10. LONG TERM DEBT

a) Credit Facilities
As at April 30, 2012, the Company had the following credit facilities available:

1. Credit facilities of $15,000 and a treasury risk management facility up to $10,000 available, bearing interest at prime, subject to certain covenants and secured by all Canadian based assets. Advances under these facilities bear interest at prime. There were no borrowings against either of these facilities as at April 30, 2012, 2011 or May 1, 2010.

2. Credit facility available of 509 Euros bearing interest at WIBOR plus 1.6% per annum. There were no borrowings outstanding under this facility as at April 30, 2012, 2011 or May 1, 2010.

11. CAPITAL STOCK (CONTINUED)

Normal Course Issuer Bid
In June 2011, the Company filed a Normal Course Issuer Bid (NCIB) with the Toronto stock exchange (“TSX”) to repurchase, at the Company’s discretion, until June 28, 2012 up to 3,751,717 outstanding common shares on the open market or as otherwise permitted, subject to normal terms and limitations of such bids. For fiscal 2012, the Company purchased and cancelled 2,046,800 (2011 – 0) common shares at a weighted average price of $12.64 (2011 - $0) per share under the NCIB.

Dividends Per Share
During the year $0.50 (2011 - $0.38) in dividends per share were declared.

12. REVENUE

<table>

15. COMMITMENTS AND CONTINGENCIES

In the normal course of operations, the Company is party to a number of lawsuits, claims and contingencies. Accruals are made in instances where it is probable that liabilities have been incurred and where such liabilities can be reasonably estimated. Although it is possible that liabilities may be incurred in instances for which no accruals have been made, the Company does not believe that the ultimate outcome of these matters will have a material impact on its consolidated financial position.
15. COMMITMENTS AND CONTINGENCIES (CONTINUED)

The Company is committed under certain operating leases with minimum annual lease payments as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Lease Payments (in thousands of Canadian dollars)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2013</td>
<td>$3,560</td>

<td>2,901</td>
</tr>
<tr>
<td>Thereafter</td>
<td>6,438</td>
</tr>
<tr>
<td></td>
<td><strong>Total</strong></td>
</tr>
</tbody>
</table>

Total operating lease expense during the year was $3,231 (2011 - $3,277).

The Company has obtained documentary and standby letters of credit aggregating to a total of $1,755 (2011 - $2,327).

16. SHARE BASED PAYMENTS

The Company established, in June 2006, a stock option plan to attract, retain, motivate and compensate employees, officers and eligible directors who are integral to the growth and success of the Company. A number of shares equal to 10% of the Company’s outstanding common shares are to be reserved for issuance under the stock option plan.

The Board of Directors administers the stock option plan and will determine the terms of any options granted. The exercise price of an option is to be set by the Board of Directors at the time of grant but shall not be lower than the market price as defined in the option plan at the time of grant. The term of the option cannot exceed 10 years. Stock options currently granted normally fully vest and expire by the end of the fifth year. The terms for all options prior to June 2006 were set by the Board of Directors at the grant date.

On September 6, 2011, the Company cancelled 630,000 options with a weighted average exercise price of $17.08 and approximate remaining vesting period of 4.2 years, and issued 630,000 new options with an exercise price of $11.88 and a vesting period of 5.0 years. As a result of cancellation and issuance of these options, the fair value of the options, calculated using the Black-Scholes model, increased by $562 and will be amortized over the remaining vesting period of the options. For these options, $75 in incremental compensation cost was recognized during fiscal 2012.

The changes in the number of outstanding share options are as follows.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Compensation expense

The share–based compensation expense that has been charged against earnings over the fiscal period is $3,164 (2011 - $3,796). Compensation expense on grants during the period was calculated using the Black–Scholes option pricing model with the following weighted average assumptions:

<table>
<thead>
<tr>
<th></th>
<th>April 30, 2012</th>
<th>April 30, 2011</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk-free interest rate</td>
<td>1.41%</td>
<td>2.52%</td>
</tr>
<tr>
<td>Dividend yield</td>
<td>4.02%</td>
<td>2.40%</td>
</tr>
<tr>
<td>Expected life</td>
<td>5 years</td>
<td>5 years</td>
</tr>
<tr>
<td>Expected volatility</td>
<td>40%</td>
<td>35%</td>
</tr>
<tr>
<td>Weighted average grant-date fair value:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Where the exercise price equaled the market price</td>
<td>$ 3.00</td>
<td>$ 4.31</td>
</tr>
</tbody>
</table>

Expected volatility is based on a combination of historical share price volatility over the past 5 years of both the Company and industry index averages. Share-based compensation expense was calculated using a weighted average forfeiture rate of 18% (2011 – 18%).

17. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company’s financial instruments consist of cash and cash equivalents, instruments held for trading, trade and other receivables, trade and other payables, provisions, deferred revenue and long term debt. Unless otherwise noted, it is management’s opinion that the Company is not exposed to significant interest or credit risks arising from these financial instruments. The Company estimates that except for instruments held for trading, the fair value of these instruments approximates the carrying values due to their short-term nature.

(a) Fair values and classification of financial instruments:

The following summarizes the significant methods and assumptions used in estimating the fair values of financial instruments:

I. The fair values of instruments held for trading is maintained level one hierarchy and are determined by the quoted market values for each of the investments in an active market at the reporting date. Gains and losses are included in interest and other income.

II. Contingent consideration is level three hierarchy. Liability has not changed since the acquisition.

III. The carrying amounts of cash, accounts receivable, trade and other payables approximate their fair value due to the short-term nature of these financial instruments. The carrying amount of long term debt approximates its fair value as it incurs interest at a variable rate adjusted for changes in the market rate.
17. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

The fair value of financial assets and liabilities, together with the carrying amounts are as follows:

<table>
<thead>
<tr>
<th></th>
<th>April 30, 2012</th>
<th>April 30, 2011</th>
<th>May 1, 2010</th>

<td>3,120</td>
</tr>
</tbody>
</table>

(b) Financial risk management:
The Company, through its financial assets and liabilities, is exposed to various risks. The following analysis provides a measurement of risks as at April 30, 2012:

Credit risk
Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash, instruments held for trading and accounts receivable the total of which is the maximum credit risk. The Company performs evaluations of the financial situations of its customers. Management does not believe that there is significant credit concentration or risk.

The Company sets up an allowance for doubtful accounts based on the credit risks of the individual customer and the customer history. Approximately 76% (2011 – 76%) of accounts receivable are outstanding for less than 90 days as at April 30, 2011. The amounts owing over 90 days are individually evaluated and provided for where appropriate in the allowance for doubtful accounts. The accounts receivable are presented as follows net of the allowance for doubtful accounts.

<table>
<thead>
<tr>
<th></th>
<th>April 30, 2012</th>
<th>April 30, 2011</th>
<th>May 1, 2010</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trade and other receivables</td>
<td>$63,614</td>
<td>$53,519</td>
<td>$49,684</td>
</tr>
<tr>
<td>Allowance for doubtful accounts</td>
<td>(1,808)</td>
<td>(787)</td>
<td>(696)</td>
</tr>
<tr>
<td></td>
<td>$61,806</td>
<td>$52,732</td>
<td>$48,988</td>
</tr>
</tbody>
</table>
17. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

The change in the allowance for doubtful accounts was as follows:

<table>
<thead>
<tr>
<th></th>
<th>April 30, 2012</th>
<th>April 30, 2011</th>
</tr>
</thead>
<tbody>
<tr>
<td>Balance at beginning of year</td>
<td>$ 787</td>
<td>$ 696</td>
</tr>
<tr>
<td>Increase in allowance</td>
<td>1,232</td>
<td>278</td>
</tr>
<tr>
<td>Bad debt recaptured and write-offs</td>
<td>(209)</td>
<td>(161)</td>
</tr>
<tr>
<td>Impact of variation in exchange rates</td>
<td>(2)</td>
<td>(26)</td>
</tr>
<tr>
<td></td>
<td>$ 1,808</td>
<td>$ 787</td>
</tr>
</tbody>
</table>

Exchange rate risk
The Company transacts a significant portion of its business in U.S. dollars and is therefore exposed to currency fluctuations.

U.S. dollar financial instruments are as follows:

<table>
<thead>
<tr>
<th></th>
<th>April 30, 2012</th>
<th>April 30, 2011</th>
<th>May 1, 2010</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash and cash equivalents</td>
<td>$ 39,919</td>
<td>$ 41,056</td>
<td>$ 13,961</td>
</tr>
<tr>
<td>Trade and other receivables</td>
<td>33,433</td>
<td>32,009</td>
<td>31,490</td>
</tr>
<tr>
<td>Trade and other payables</td>
<td>(3,742)</td>
<td>(2,731)</td>
<td>(3,818)</td>
</tr>
<tr>
<td></td>
<td>$ 69,610</td>
<td>$ 70,334</td>
<td>$ 41,633</td>
</tr>
</tbody>
</table>

Based on the financial instruments as at April 30, 2012, a 5% change in the value of the U.S. dollar would result in a gain or loss of $3,480 in earnings before tax.

Liquidity Risk
Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with its financial liabilities. The Company's primary source of liquidity is its cash reserves. The Company also maintains certain credit facilities to support short term funding of operations and trade finance. The Company believes it has sufficient available funds to meet current and foreseeable financial requirements.

Investment Risk
The Company invests in marketable securities that are traded in an active market. Generally the investment is limited to no more than 15% of the total cash and instruments held for trading.
18. SEGMENTED INFORMATION

The Company reviewed its operations and determined that it operates a single reportable segment, the television broadcast equipment market. The single reportable operating segment derives its revenues from the sale of hardware and software solutions including related services, training and commissioning.

19. RELATED PARTY TRANSACTIONS

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Company and other related parties are disclosed below.

Related Party Transactions

Two shareholders each indirectly hold a 10% interest in the Company’s leased premises in Ontario. This lease expires in 2019 with a total of $5,798 committed over the remaining term. During the year, rent paid for the leased principal premises amounted to $797 (2011 – $797) with no outstanding amounts due as at April 30, 2012.

The Company also leases property where two shareholders indirectly own 100% interest. This lease expires in 2016 with a total of $1,108 committed over the remaining term. During the year, rent paid was $223 (2011 – $240) with no outstanding amounts due as at April 30, 2012.

On December 1, 2008 the Company entered into an agreement with two shareholders who each indirectly hold a 20% interest in the Company’s leased premises in Ontario. This lease expires in 2018 with a total of $5,205 committed over the remaining term. During the year, rent paid for the leased principal premises amounted to $721 (2011 - $700) with no outstanding amounts due as at April 30, 2012.
19. RELATED PARTY TRANSACTIONS (CONTINUED)
On December 15, 2008 the Company entered into a lease agreement with a director who indirectly owns 100% interest. The lease expires in 2013 with a total of $226 committed over the remaining term. During the year, rent paid was $132 (2011 - $130) with no outstanding amounts due as at April 30, 2012.

On May 1, 2009 the Company entered into an agreement with two shareholders who each indirectly hold a 35% interest. This lease expires in 2019 with a total of $3,190 committed over the remaining term. During the year, rent paid was $419 (2011 - $399) with no outstanding amounts due as at April 30, 2012.

These transactions were in the normal course of business and recorded at an exchange value established and agreed upon by related parties.

The remuneration of directors and other members of key management personnel for the years ended April 30, 2012 and April 30, 2011 are as follows.

<table>
<thead>
<tr>
<th></th>
<th>2012</th>
<th>2011</th>
</tr>
</thead>
<tbody>
<tr>
<td>Short-term benefits</td>
<td>$3,885</td>
<td>$3,867</td>
</tr>
<tr>
<td>Share-based payments</td>
<td>340</td>
<td>871</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$4,225</strong></td>
<td><strong>$4,738</strong></td>
</tr>
</tbody>
</table>

Short-term benefits include salaries, bonuses and non-monetary benefits such as Company vehicles.

20. CAPITAL DISCLOSURES
The Company’s capital is composed of shareholders’ equity. The Company’s objective in managing capital is to ensure sufficient liquidity to finance increases in non-cash working capital, capital expenditures for capacity expansions, pursuit of selective acquisitions and the payment of quarterly dividends.

The Company takes a conservative approach towards financial leverage and management of financial risk and the Company currently satisfies their requirements out of its internally generated cash flows.

The Company is not subject to any capital requirements imposed by a regulator.

21. EARNINGS PER SHARE

<table>
<thead>
<tr>
<th></th>
<th>2012</th>
<th>2011</th>
</tr>
</thead>
<tbody>
<tr>
<td>Weighted average common shares outstanding</td>
<td>73,612,759</td>
<td>73,989,997</td>
</tr>
<tr>
<td>Dilutive effect of stock options</td>
<td>200,008</td>
<td>889,142</td>
</tr>
<tr>
<td>Diluted weighted average common shares outstanding</td>
<td>73,812,767</td>
<td>74,879,139</td>
</tr>
</tbody>
</table>

The weighted average number of diluted common shares excludes 927,500 options because they were anti-dilutive during the period (2011 – 650,000).

22. INCOME TAXES
The Company’s effective income tax rate differs from the statutory combined Canadian income tax rate as follows:

<table>
<thead>
<tr>
<th></th>
<th>2012</th>
<th>2011</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td></td>
<td>$ 7,331</td>
<td>$ 7,095</td>
<td>$ 5,895</td>
</tr>
</tbody>
</table>

23. NON-CURRENT ASSETS HELD FOR SALE
The Company has assets that have been classified as held for sale. Efforts to sell the assets have already commenced and are expected to be sold before the end of the year. An impairment loss of $420 has been recorded on the remeasurement of the assets to the lower of their carrying amount and their fair value less costs to sell, and was recorded within other income and expenses.

24. FIRST-TIME ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS
For all periods up to and including the year ended April 30, 2011, the Company prepared its financial statements in accordance with Canadian GAAP. These financial statements, for the year ended April 30, 2012, are the first annual financial statements which the Company has prepared in accordance with IFRS.

Accordingly, the Company has prepared financial statements which comply with IFRS applicable for periods beginning on or after May 1, 2010 (the date of transition) as described in the significant accounting policies in Note 2 of the consolidated financial statements. The principal adjustments made by the Company in its reconciling from Canadian GAAP balance sheet as at May 1, 2010 and its previously published Canadian GAAP financial statements for the year ended April 30, 2011 and in accordance with IFRS 1 “First-time adoption of International Financial Reporting Standards” to IFRS as described below.

Exemptions applied and mandatory exceptions
IFRS 1, First-Time Adoption of International Financial Reporting Standards, allows first-time adopters certain exemptions from the general requirement to apply IFRS as effective for April 2012 year ends retrospectively. IFRS 1 also includes mandatory exceptions to the retrospective application of IFRSs.

The Company has applied the following exemptions:

IFRS 2 - Share-based payment transactions
IFRS 1 does not require first-time adopters to apply IFRS 2, Share Based Payment, to equity instruments that were granted on or before November 7, 2002, or equity instruments that were granted subsequent to November 7, 2002 and vested before the date of transition to IFRS. The Company has elected not to apply IFRS 2 to awards that vested prior to May 1, 2010, which had been accounted for in accordance with Canadian GAAP.

IFRS 3 - Business Combinations
IFRS 1 indicates that a first-time adopter may elect not to apply IFRS 3, Business Combinations, retrospectively to business combinations that occurred before the date of transition to IFRS. The Company has taken advantage of this election and has applied IFRS 3 to business combinations that occurred on or after May 1, 2010. In accordance with the IFRS 1 exemption the Company has also elected to not retroactively apply IAS 21, The Effects of Changes in Foreign Exchange Rates, on fair value adjustments and goodwill arising in business combinations that occurred before May 1, 2010.
24. FIRST-TIME ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS (CONTINUED)

IAS 21 - Cumulative translation differences

IFRS 1 provides the option to reset the balance of the cumulative foreign currency translation adjustment to zero on the date of transition. The Company has chosen to apply this election and has eliminated the cumulative translation difference and has adjusted retained earnings by the same amount at the date of transition to IFRS. If, subsequent to adoption, a foreign operation is disposed of, the translation differences that arose before the date of transition to IFRS will not affect the gain or loss on disposal.

The Company has applied the following mandatory exceptions:

IFRS 1 - Estimates
In accordance with IFRS 1, an entity’s estimates under IFRS at the date of transition to IFRS must be consistent with estimates made for the same date under previous GAAP, unless there is objective evidence that those estimates were in error. The Company’s IFRS estimates as of May 1, 2010 are consistent with its Canadian GAAP estimates for the same date.

Other exceptions
The three remaining mandatory exceptions to the retrospective application of IFRSs relate to the de-recognition of financial assets and liabilities, hedge accounting and assets classified as held for sale and discontinued operations. The Company has determined that these mandatory exceptions have not had a material impact on the consolidated financial statements.

IFRS employs a conceptual framework that is similar to Canadian GAAP. However, significant differences exist in certain matters of recognition, measurement and disclosure. While adoption of IFRS has not changed the Company’s actual cash flows, it has resulted in changes to the Company’s reported financial position and results of operations. In order to allow the users of the financial statements to better understand these changes, the Company’s Canadian GAAP statement of earnings, statement of comprehensive income and statement of financial position for the year ended April 30, 2011 have been reconciled to IFRS, with the resulting differences explained.
## Reconciliation of Statement of financial position as at April 30, 2011

24. FIRST-TIME ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS (CONTINUED)

Notes to the financial statement reconciliations

(1) The Company has retroactively applied IAS 16, Property, Plant and Equipment, which requires the Company to identify the significant components of its property, plant and equipment and depreciate these parts separately over their respective useful lives. The impact of the retroactive application of the increased componentization has resulted in an increase in the net book value of property, plant and equipment, and retained earnings at the date of transition and an increase in subsequent amortization expense.

(2) IAS 37, Provisions, Contingent Liabilities and Contingent Assets, requires separate disclosure of provisions on the face of the statement of financial position. This was not required under previous Canadian GAAP; therefore, all provisions were reclassified from accounts payable and accrued liabilities upon transition. Additionally, provisions as at May 1, 2010, as reported under Canadian GAAP, were re-assessed in accordance with the provisions of IAS 37. As a result of measurement differences between Canadian GAAP and IFRS, the Company increased its provision for site restoration costs.

(3) IAS 11, Construction Contracts, requires revenues on projects which meet the definition of a construction contract to be measured using the percentage of completion method. The Company has identified certain long-term contracts which meet the definition of construction contracts for which no revenues were previously recognized until shipment and transfer of title to customers were completed. The recognition method relating to these contracts has been restated to reflect the percentage of completion method.

(4) The Company has elected under IFRS 1 not to apply IFRS 3 retrospectively to business combinations that occurred prior to May 1, 2010. Accordingly, the Company has continued with the same accounting treatment for business combinations completed before that time under Canadian GAAP. For all business combinations that occurred on and subsequent to May 1, 2010 all business acquisitions were accounted for in accordance with IFRS 3. Under IFRS 3 all acquisition related transaction costs are expensed as incurred, as opposed to Canadian GAAP where the costs are capitalized during the purchase price allocation. Acquisitions during the year ended April 30, 2011 resulted in $172 in acquisition related transaction costs.

(5) IAS 12, Income Taxes, requires net deferred income tax assets and liabilities to be adjusted for the tax effects of revaluing foreign currency denominated non-monetary balances held by entities where the functional currency is different than the local tax currency. As this was not a requirement under Canadian GAAP, an adjustment is required upon transition.

(6) Under IFRS, any liabilities or assets relating to a non-controlling interest are required to be classified as equity and presented separately from the equity attributable to shareholders of the Company. As such, the liabilities associated with the non-controlling interest have been reclassified within the statement of financial position.

(7) Under IFRS all deferred tax balances are required to be classified as non-current, regardless of the classifications of the underlying assets or liabilities, or the expected reversal date of the temporary differences. The reclassification of all deferred tax balances to non-current also impacts the netting of deferred tax assets and liabilities within or between the taxable entities of the Company.

(8) Under IFRS future forfeiture rates relating to the percentage of options that will not vest must be estimated and recorded as a reduction in stock compensation expense. Under Canadian GAAP forfeitures are recognized and used as a reduction in the expense as incurred. As such, the Company has retroactively estimated forfeiture rates for all options vesting subsequent to the translation date and retroactively adjusted cumulative stock compensation expense.

(9) Given the change in guidance noted above under IAS 11, Construction Contracts, and other factors, deferred revenue has been determined to be a material balance requiring segregation on the balance sheet. As such, deferred revenue has been reclassified from accounts payable to its own line item.

(10) Under the requirements of IAS 21, the Company is required to assess the functional currency of all subsidiary entities no matter where the entity resides. Upon the review upon transition it was concluded a subsidiary previously accounted for as an integrated operation has a functional currency different from the parent. The impact of the adjustment has resulted in the reclassification of prior year foreign exchange adjustments from foreign exchange expense to the cumulative translation adjustment within comprehensive income.

(11) Under the requirements of IAS 21, the Company is required to assess the functional currency of all subsidiary entities no matter where the entity resides. Upon transition it was concluded an entity previously accounted for as a self-sustaining operation has a functional currency consistent with the parent. As noted under discussions related to IFRS 3, the Company has taken the IFRS 3 exemption to maintain goodwill at its historical cost. The impact of the adjustment has resulted in an adjustment of goodwill ensuring it is maintained at its historical translation rate as opposed to the spot rate used under Canadian GAAP.

(12) As noted under discussions relating to IAS 21, the Company has elected to apply the IFRS 1 election allowing for the resetting of the cumulative translation adjustment balance as at May 1, 2010 to zero.

Reconciliation of consolidated cash flows
There are no material differences between the statement of cash flows presented under IFRS and the statement of cash flows under Canadian GAAP.

25. SUBSEQUENT EVENT
On June 13, 2012 the Company declared a dividend of $0.14 with a record date of June 22, 2012 and a payment date of June 29, 2012.
